The ROAD from CHRIST to CONSTANTINE

This compelling series takes viewers on an exciting and visually stunning journey to the beautiful and historic places where Christianity was born and grew from a small movement to its place as the official religion of the Roman Empire. Join author and distinguished history professor Jonathan Phillips of Royal Holloway, University of London, as he takes viewers on a captivating adventure through four centuries and seven countries throughout the Middle East, North Africa, and Europe, to the very places where Christianity began. **6x52 HD**

THE AGE OF THE DRONE

A revolution is happening overhead. Super-surveillance drones that can see objects as small as six inches across and track human movements are starting to appear in our skies. Amazon.com plans to deliver goods door-to-door using drones, startups in Silicon Valley are figuring out how to use drones to deliver medicine where there are no roads, and farmers in Japan already use them to spray 90 percent of soy crops. Anyone can now buy and fly their own remotely piloted drone for a relatively small cost, and by 2020 the United States Federal Aviation Agency anticipates that more than 20,000 drones will be in the air in North America, not including those flown by amateur operators. These drones raise many issues about privacy and safety—and although there are regulations governing drone use, they are almost impossible to police. Drones are here to stay, but who should be allowed to use them, and how? **1x52 HD**

NH FOR SHUTTERSTOCK.COM

KILLER LANDSLIDES

In March 2014, residents along a river in the mountains of Washington state were interrupted by the terrifying sound of the equivalent of three million dump truck loads of earth plummeting down the valley. In less than two minutes, a one-square-mile field of debris, 20-feet deep, slammed into the neighborhood. Now, geomorphologists are tracing the geological history of Oso, to explain why the site was so unstable. But all around the world scientists have reason to fear that the worst is yet to come. Globally, landslides and other ground failures cost more lives and money each year than all other natural disasters combined, and climate change could cause an increase in landslide activity worldwide. NOVA discovers how new satellite monitoring technologies are giving researchers hope that they may be able to predict landslides and issue life-saving warnings to those in their path. **1x53 HD**

PRINCE JONES FOUNDATION

The Black Panthers: Vanguard of the Revolution

Reviled, adored, misunderstood, and mythologized, more than 40 years later the Black Panther Party retains a powerful hold on popular imagination worldwide. Featuring a broad variety of perspectives—from police, FBI agents and infiltrators, journalists, white supporters and detractors, and Panther leaders—this documentary provides a dramatic, scholarly, and unbiased look at what may be the most controversial group in American history. This compelling narrative is driven by a rich soundtrack of the iconic music of the 1960s and 70s, complemented by a new score featuring the sounds of jazz, rap, and soul. **2x60 HD**

HISTORY

ICON FILMS

The Craven Street Bones

When the skeletal remains of at least 10 people, including several infants, turned up in the basement of Benjamin Franklin's London residence, people wondered if the founding father might have had a much darker side as the bones had been meticulously cut and drilled. Franklin was aware of the bodies in his basement, but they weren't the victims of violent acts. Rather, they were used for the purposes of an illegal anatomy school that helped shaped modern medicine. **1x60 HD**

Firestone and the Warlord

What are the costs of doing business in a war zone? FRONTLINE and ProPublica investigate the secret relationship between the American tire company Firestone and the infamous Liberian warlord Charles Taylor. Based on previously unreported diplomatic cables, court documents, and inside accounts from Americans who helped run the company's rubber plantation as Liberia descended into chaos, the investigation reveals how Firestone conducted business during the brutal Liberian civil war. With all eyes on Liberia as the country battles the worst Ebola outbreak in recorded history, *Firestone and the Warlord* raises provocative questions about corporate responsibility, accountability, and the ethical ramifications of doing business in conflict zones. **1x83 HD**

HISTORY, ART & CULTURE

© RIPLEY ENTERTAINMENT INC.

Ripley: Believe it or Not

LeRoy Robert Ripley rose to fame during the Great Depression, transforming himself from a skinny, buck-toothed boy into an entertainer who mesmerized the nation with his razzle-dazzle blend of homespun Americana, colorful exotic, and freakish oddities. Over three decades, his "Believe It or Not!" franchise grew into an entertainment empire, expanding from newspapers to every form of "new media" in the 20th century: radio, film and, ultimately, television. At the center of it all was Ripley, whose obsession with the odd and keen eye for the curious made him one of the richest men in the country. This is the story of the man who popularized the iconic phrase, and proof of why we still can't resist his challenge to "Believe it—or not!" **1x60 HD**

HISTORY

The Day the 60s Died

(working title)

On April 30, 1970, President Richard Nixon shocked the country by announcing the U.S. invasion of Cambodia. At college campuses across the United States, masses of previously uninvolved students took to the streets in protest. Five days later, four unarmed Kent State students were shot dead by National Guardsmen. In many ways, this event and the spasm of violent unrest that followed marked a fever pitch in the conversation about class, race, freedom, and democracy. *The Day the 60s Died* delves into the lives of Americans at the heart of the conflict—from the students and soldiers who witnessed Kent State to a young foot soldier in the Cambodian jungle; from construction workers fighting demonstrators on Wall Street to the survivors of the all but forgotten police shootings of Jackson State students. **1x60 HD**

THE END OF WORLD WAR II

70
YEARS

ANNIVERSARY OF NOTE

JANUARY–MAY 1945 : LIBERATION OF CAMPS AND END OF WAR IN EUROPE

Memory of the Camps

In the spring of 1945, Allied forces liberating Europe found evidence of atrocities which have tortured the world's conscience ever since. As the troops entered the German concentration camps, they made a systematic film record of what they saw. Assembled and edited that summer under the supervision of the British Ministry of Information and the American Office of War Information, some of the documentary editing was done under the direction of Alfred Hitchcock—but the film was left unfinished. FRONTLINE found it stored in a vault of London's Imperial War Museum and, in 1985, broadcast it for the first time. Thirty years later, *Memory of the Camps* remains one of the most definitive and unforgettable records of the 20th century's darkest hour. **1X57**

The War

Directed and produced by Ken Burns and Lynn Novick, *The War* explores the most intimate human dimensions of the greatest cataclysm in history: a worldwide catastrophe that touched the lives of every family on every street in every town in America and demonstrates that in extraordinary times, there are no ordinary lives. Throughout the series, the experience of combat is brought vividly to life as veterans describe what it was like to fight and kill at places like Monte Cassino, Anzio, and Omaha Beach; the Hürtgen Forest, the Vosges Mountains, and the Ardennes; and on the other side of the world at Guadalcanal, Tarawa, and Saipan; Peleliu, the Philippine Sea, and Okinawa. The film honors the bravery, endurance, and sacrifice of those who lived through the war. **1X60, 7X120 HD**

D-Day 360

After two years on the drawing board, D-Day was the most meticulously planned operation in military history—a logistical effort on a scale never seen before or since. On June 6, 1944, 3,000 planes dropped 23,000 airborne troops behind German lines, and 7,000 ships delivered around 20,000 military vehicles and 130,000 allied soldiers to storm five heavily defended French beaches in an all-or-nothing assault on Nazi-occupied Europe. Focusing on the most important strip of Omaha beach that day—the exit at Vierville-sur-Mer—*D-Day 360* strips D-Day back to its raw data to reveal how the odds of victory, in the greatest gamble of World War II, swung on what happened over a five-hour period on a five mile stretch of French coastline. Data gathered through forensic laser scanning, 3D computer modeling, and eye-witness accounts bring the battlefield to life as never before. **1X54 HD**

AUGUST 1945 : ATOMIC BOMBINGS OF HIROSHIMA AND NAGASAKI, JAPAN

Uranium: Twisting the Dragon's Tail

The year 2015 marks the 70th anniversary of one of the most profound changes in the history of human enterprise on Earth—the unleashing of the elemental force within uranium; the unleashing of the dragon. The story of uranium, one of the most dangerous and curious rocks on the planet, is part science, part history, and all epic adventure. Uranium was born violently in the collapse of a star long ago, and is created within the fabric of Earth—spitting energy that transforms DNA, and shaping the very nature of what it means to be human. This rock, once considered worthless, transformed itself into the most desirable, most expensive, and most feared substance in the world, and on a warming planet with limited fossil fuel, uranium may transform again, into our savior. An action-packed journey that explores the most dangerous, wondrous, and controversial rock on Earth—this stunning series is filmed in Russia, Japan, North America, Europe, and Australia. **3X60, 2X60 HD**

1000 Days of Fear: The Deadly Race at Los Alamos

1000 Days of Fear is the inside-the-barbed-wire story of the brilliant men and women who worked on the Manhattan Project at Los Alamos. The fascinating personalities behind the creation of the world's first atomic bomb were as extraordinary, and often as explosive, as the science they were working in. Through first-hand accounts, never-before-seen interviews, and Los Alamos lore, this documentary looks inside these atomic insiders' hearts and minds, their triumphs and failures, their bravery in the face of paralyzing fear and, ultimately, their war-winning and world-changing accomplishments. **3X60 HD**

The Bomb in HD (working title)

For 70 years, the world has been terrified—yet also comforted—by the atomic bomb. Every generation since 1945 has grown up with the specter of nuclear holocaust, but today the threat of nuclear annihilation has largely receded from consciousness. Even as the U.S. and Russia have reduced their stocks of the bomb, the simple black-and-white playing field of the Cold War has been replaced by a complex and unsettled world in which a terrorist with a small nuke in a pickup truck may be a significantly greater threat than the old superpower doomsday scenarios of *Fail Safe* or *Dr. Strangelove*. Yet this much is clear: the number of human deaths from war had risen precipitously higher throughout history, until August 1945. From that moment—when the atomic bomb made its appearance on the world stage—the number of deaths from war has dropped enormously. Judged by that measure, the A-bomb may actually have made the world safer. . . so far. **1X120 HD**

The Day After Trinity

An Emmy® Award-winning documentary about those who build nuclear weapons, this extremely moving work concentrates on the life story of physicist J. Robert Oppenheimer and his role in producing the first atomic bomb. A strong drama of personal, political, and moral forces is revealed through the use of declassified government footage and in-depth, personal interviews with the major surviving participants in the Oppenheimer story. The effect of the film is profoundly emotional, evoking a time when millions of Americans rejoiced that such a weapon “worked” without possibly foreseeing its still-resounding results. **1X59, 1X88 HD**

Also available for this anniversary: *Victory in the Pacific*, *The Bombing of Germany*, *The Rape of Europa*, *Never Forget to Lie*, and *The Ghost Army*

HEALTH CRISES

Outbreak (working title)

Outbreak is the inside story of an avoidable tragedy, investigating how this Ebola outbreak started and why it has grown to its current levels with little initial response from the global community. On invitation from the United Nations, FRONTLINE producer Dan Edge (*Solitary Nation*, *Inside Japan's Nuclear Meltdown*) has joined the emergency mission to West Africa spearheaded by the United Nations Mission for Emergency Ebola Response (UNMEER), and has travelled from the slums of Monrovia to the remote forest region of Guinea, filming the setup of the emergency mission. With unique access, FRONTLINE combines vivid, specially shot material from the Ebola zone with testimony from key global decision-makers, those battling the disease on the ground, and those who have endured infection, to expose the decisions and developments that brought the outbreak to the level of emergency it is today. *Outbreak* features in-depth interviews with key personnel in the United Nations, World Health Organization, Centers for Disease Control, Médecins Sans Frontières, and the governments from the Ebola-infected countries as it tries to answer the questions: How did it come to this? How can we stop this from happening again? **1x60 HD**

The Forgotten Plague

For nearly two centuries, tuberculosis was America's leading cause of death, responsible for one in five fatalities. It shaped medical and scientific pursuits, social habits, economic development, and government policy, but TB and its impact are poorly understood. In 1943, Albert Schatz, a microbiologist at Rutgers, discovered streptomycin, an antibiotic that was heralded as a miracle cure. Within two years, streptomycin had liberated many patients from the sanitarium, but the tuberculosis bacterium began mutating into drug-resistant strains. For decades, deaths from TB in the U.S. declined to the point where it seemed the disease would be eradicated. Then, in the early 1990s, it suddenly reappeared and an epidemic in New York City sent public health officials scrambling. The disease that has stalked the nation for centuries stubbornly refuses to die. **1x60 HD**

The Bloody Truth

Despite recent progress in containing the AIDS pandemic, HIV is still a killer of epic proportions. Understanding the origins of the virus could provide crucial clues to help in the battle against it. *The Bloody Truth* follows an international team of scientists on their search for the origins of HIV in the hospitals and primeval forests of central Africa. Their efforts to salvage a mysterious medical archive containing tissue samples dating from the Colonial era provide evidence of how the ground was prepared for the AIDS pandemic, shedding a new light on the virus' origins, and providing vital information on how to fight potential future pandemics, such as Ebola. **1x52 HD**

Hunting the Nightmare Bacteria

FRONTLINE investigates the alarming rise of untreatable infections—from a young girl thrust onto life support in an Arizona hospital, to a young American infected in India who comes home to Seattle, and an uncontrollable outbreak at the nation's most prestigious hospital, where 18 patients were mysteriously infected and six died, despite frantic efforts to contain the killer bacteria. Fueled by decades of antibiotic overuse, the crisis has deepened as major drug companies have abandoned the development of new antibiotics. Without swift action, the miracle age of antibiotics could be coming to an end. **1x56 HD**

The Trouble with Antibiotics

Each year, an estimated 2 million people in the U.S. are infected with antibiotic-resistant bacteria—and at least 23,000 die. As the health crisis deepens, FRONTLINE turns the spotlight on the American farm, a sector that comprises an estimated 70 percent of all antibiotics sold, and investigates new research focusing on how antibiotics on farms might be contributing to the growth of resistant bacteria that threaten the health of people. *The Trouble with Antibiotics* traces the history and controversy over antibiotics in agriculture, discovers gaps in basic data about how antibiotics are used on the farm, and raises questions about why that information does not exist. Also this hour, FRONTLINE returns to the story of a superbug outbreak at one of the United States' most prestigious research hospitals, the National Institutes of Health Clinical Center, with an exclusive interview with the parents of a young man who died in the outbreak. **2x30, 1x60 HD**

Navy SEALs—Their Untold Story

Despite the attention paid to the U.S. Navy SEALs (Sea, Air and Land) since their daring takedown of Osama bin Laden, few know the story of how the first U.S. Navy frogmen became the renowned warriors of today. Discover how these clandestine commandoes morphed with evolving threats from Hitler to bin Laden. The Navy's first special warfare units date back to World War II, and, without them, much of U.S. and world history would have been written differently, from the beaches of Normandy to the Pacific theater, Korea, Vietnam, Iraq, and Afghanistan. Through firsthand accounts and never-before-seen footage, this unprecedented documentary recounts many of the ticking-clock missions of the "Commandoes of the Deep." **1x120 HD**

HISTORY

COURTESY OF THOMAS EDISON NATIONAL HISTORIC SITE

Edison

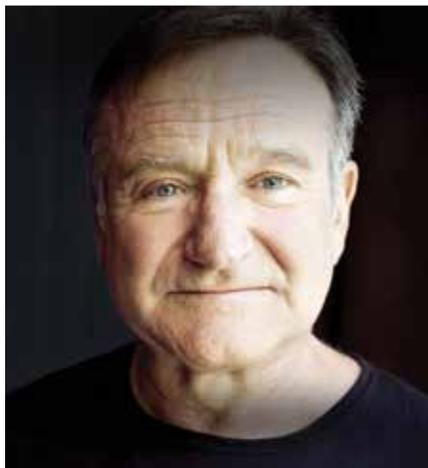

He invented the light bulb, the phonograph, the movie camera, and the nickel-iron-alkaline storage battery. He devised a system for producing synthetic carbolic acid and for wireless telegraph communication between moving trains and stations. By the time of his death, Thomas Alva Edison could lay claim to 1,093 successful U.S. patents. But perhaps his greatest invention was himself. Born to a Canadian innkeeper, Edison received his only formal education from his mother at the kitchen table. His first invention was a commercial flop, but by the time he was 35, he had become the nation's most prominent celebrity inventor. Tragically, the pace of his work took a terrible toll on his private life. His first wife appears to have killed herself with a lethal dose of morphine; his second was desperately unhappy. And yet, in so many ways, Edison transformed daily life for millions of people and in the process turned himself into the most famous American in the world. **1x120 HD**

Drawing on interviews with policymakers and military leaders, the film traces the U.S. role from the 2003 invasion to the current violence, showing how Iraq itself is coming undone, how we got here, what went wrong, and what happens next. **1x53, 1x86 HD**

FARM TO TABLE

In Defense of Food

What should we eat? Until the early 20th century, the answer to this question was simply dictated by what was grown nearby, readily available, and unspoiled. But 100 years later, the struggle over what to eat has become one of the most complicated, confounding, and urgent battles facing the world. Based on Michael Pollan's best-selling book, *In Defense of Food* shows how a combination of uncertain and incomplete science, politicians, and clever marketing campaigns have shaped the world's eating habits in ways that have made us continuously less healthy. From crowded American supermarkets to the vast plains of Tanzania, *In Defense of Food* examines how the modern Western diet, especially as it has evolved over just the past few decades, is doing serious damage to our health. **1x60, 1x120 HD**

The Botany of Desire

“... two hours of pure joy that contains all the requisites of must-see TV—it's intriguing and fascinating, engaging, entertaining and educational. It's brilliant.” —*Newsday*

Botany of Desire tells the utterly original story of four everyday plants and the way they have domesticated humankind. In 1983 Michael Pollan and his wife left New York City to make a new home on an abandoned dairy farm. Pursuing a childhood fascination with gardening and an old-fashioned hubris about his ability to control nature, Pollan set about creating a garden. He had no way of knowing that it would eventually lead him to an original and provocative re-interpretation of the relationship between plants and people. This two-hour documentary, based on Pollan's best selling book *The Botany of Desire*, takes viewers from the potato fields of Peru and Idaho to the apple forests of Kazakhstan, from the tulip markets of Amsterdam to the medical marijuana grow rooms of the United States. Along the way, the programs explore the natural history of the apple, the tulip, marijuana, and the potato—and the human desires that link their destinies to our own. **2x56 HD**

In Their Own Words

In Their Own Words is a stylish new biography series that explores an elite few of the 20th century's greatest figures, illuminating their fascinating personalities and profound cultural and historical impact. The series features episodes on a diverse trio of extraordinary subjects: three-time World Heavyweight Champion boxer Muhammad Ali, Muppets creator Jim Henson, and Britain's long-reigning monarch, Queen Elizabeth II. Each chapter is inspired by some of the most memorable words spoken by these world icons—words that describe the subject creatively and intimately. Stylized, evocative recreations of significant moments in the subjects' lives add texture to the visual storytelling and also serve as background for some of the featured quotes. **3x60 HD**

LIFE IN THE WILD

Return to the Wild: The Chris McCandless Story

Twenty years ago Chris McCandless, the accomplished son of middle class parents, severed all ties with his past, burned or gave away all his money, changed his name, and headed into the Denali National Park and Preserve. He was later found dead in an abandoned bus in the Alaskan wilderness. His story captured the minds of the world and he became the subject of the best-selling book and movie, *Into the Wild*. This new documentary takes a fresh look at the enigmatic story of the young American adventurer, retracing his steps to try to understand why he left everything behind to travel into the wilderness to live on his own. McCandless' own letters, released for the first time, as well as new and surprising interviews probe the mystery that still lies at the heart of a story that has become part of the American literary canon. **1x60 HD**

Mystery of the Arctic Cairn

A subzero adventure with a historical twist, *Mystery of the Arctic Cairn* follows four men and their Inuit dogs on an expedition to cross the Canadian Arctic in the footsteps of Otto Sverdrup—a Norwegian polar legend who mapped 150,000 square kilometers of land in the Arctic Circle in 1898. The quest to find Sverdrup's lost cairn, which was enticingly described in his expedition diary, leads to incredible interactions between the explorers and wildlife, including a stand-off with a polar bear and a dance with arctic wolves. **1x54 HD**

Alaska's Wild Peninsula

The Alaska Peninsula is a cloud-cloaked land of towering volcanoes, vast tundra, and the greatest concentration of the largest bears on Earth. At the base of the peninsula lies Katmai National Park, a wilderness larger than Yellowstone and Yosemite combined. Farther down the peninsula a giant volcanic caldera emerges on the horizon, so remote that more people climb Everest than visit Aniakchak. A stunningly photographed, lyrical film on a landscape where bears outnumber people and the sockeye salmon run is the most prolific in the world, *Alaska's Wild Peninsula* captures the essence of Alaska—both its wilderness and its historic past. **1x52 HD**

Battle Zones: Ukraine & Syria

FRONTLINE goes inside the raging battle zones of Ukraine and Syria. In Ukraine, with personal and dramatic footage, *Battle Zones* reveals the deep-seated hatreds between right-wing Ukrainian nationalists with historic ties to the Nazis, and violent pro-Russian separatists vying for control of the country. And in Syria, rebel fighters say they're being secretly armed and trained by the United States. **1x32, 1x18 HD**

HISTORY

FRANKLIN D. ROOSEVELT PRESIDENTIAL LIBRARY

The Roosevelts: An Intimate History

“... a stunning reminder of why Ken Burns, having revolutionized the documentary series, continues to be the best in the business.”
—*Los Angeles Times*

Ken Burns chronicles the lives of Theodore, Franklin, and Eleanor Roosevelt—three members of the most prominent and influential family in American politics—interweaving their individual stories into a single narrative for the first time in a major documentary television series. Together, these three Roosevelts not only redefined the relationship Americans had with their government and with each other, but also redefined the role of the United States within the wider world. The series encompasses the history the Roosevelts helped to shape: the creation of national parks, the digging of the Panama Canal, the passage of innovative New Deal programs, the defeat of Hitler, and the postwar struggles for civil rights at home and human rights abroad. It is also an intimate human story about love, betrayal, family loyalty, personal courage, and the conquest of fear. **7x60 HD**

Klansville, U.S.A.

As the Civil Rights Movement grew into a force in the 1960s, the Ku Klux Klan, dormant for decades, reemerged with a vengeance. Born in Tennessee following the Civil War, the KKK had conducted an intense campaign of intimidation throughout the South before quickly fading out during Reconstruction. It was reborn at Stone Mountain, Georgia in the 1920s, sparked by the release of the epic film *Birth of a Nation*. Though its membership grew to four million, the Klan again lost its mass support and political clout within a decade. That the Klan came back for a third time wasn't surprising—but where that reincarnation took place was. *Klansville, U.S.A.* is an exploration of why North Carolina, long seen as the most progressive state in the South, became home to the largest Klan organization in the country, with more members than all the other Southern states combined during the 1960s. **1x60 HD**

LAST DAYS IN VIETNAM

“Observant, incisive, and at times both heartrending and inspiring.”—*The Hollywood Reporter*

Panic gripped Saigon on April 29, 1975, as thousands scrambled to flee a city about to fall to Communist forces. Mobs swarmed the U.S. embassy, scaling the walls in an effort to get on one of the last choppers out. Over the course of 18 hours, 70 U.S. helicopters flew 630 rescue missions evacuating Americans and Vietnamese. Many of the most remarkable rescue efforts during the haphazard and chaotic evacuation succeeded because of the ingenuity of individual marines and CIA operatives who ensured that American and Vietnamese co-workers and friends made their way to safety. During the rush to get out, the U.S. government left behind thousands of Vietnamese loyal to the United States, many of whom had reason to fear for their lives. **1X98, 1X114 HD**

Lost City of Petra

For over a millennium, Petra was lost to the Western world and less than one percent of the city has been explored in the 200 years since its rediscovery. Now, in a daring experiment, an archaeologist and a team of sculptors carve an iconic temple-tomb to find out how the ancient people of Petra built their city of stone. In *Lost City of Petra*, scientists travel to the site in modern-day Jordan to use remote sensors and hydraulic flumes to discover a city of the living—complete with a water system that not only supplied 30,000 people with enough to drink, but also filled bathhouses, fountains, and pools with such abundance that some scholars believe this desert metropolis may have been the Las Vegas of the ancient world. The race is on to discover how these nomads created an oasis of culture in one of the harshest climates on Earth, and ultimately, why Petra disappeared. **1X53 HD**

Language Matters

There are more than 6,000 languages remaining in the world. We lose one every two weeks; hundreds will be lost within the next generation. By the end of this century, half of the world's languages will have vanished. Follow poet Bob Holman as he travels to a remote island off the coast of Australia to visit with aboriginal people who speak 10 different languages, then to Wales where Welsh is making a comeback, and on to Hawaii, where a group of Hawaiian activists are fighting to save their native tongue. This two-hour documentary asks: What do we lose when a language dies? What does it take to save a language? *Language Matters* includes interviews with song men, linguists, and poets, including Charlie Mangulda, the only living speaker of Amurdak, an Aboriginal language once common in Australia's Northern Territory. The film also features original music and songs in Welsh, Hawaiian, and Aboriginal languages. **1X120 HD**

Secrets of the Colosseum

The Colosseum is one of the most iconic buildings of the ancient world—legendary, mythical, even magical—and it stands as a monument to Roman imperial power and cruelty. The spectacles staged here involved the killing of tens of thousands of gladiators, prisoners, and wild animals. Records of these games brag of seemingly impossible acts—beasts magically appearing on stage and water flash-flooding the arena so that full-sized ships could engage in sea battles. Were the Romans exaggerating or did they truly achieve these feats? Until now, experts have been dubious—but what if these aren't tall tales? Now, a team of modern builders and engineers test their theories by building a trap door-pulley system capable of lifting a beast into the Colosseum. Do they have what it takes to replicate the innovation and ingenuity of the Romans? **1X53 HD**

Bones of the Buddha

In Northern India in 1898, British landowner Willie Peppe set his workers digging on a mysterious hill with no idea what they may find. What they discovered led to a real life Indiana Jones tale, brimming with deception, priceless treasure, intrepid adventurers, and international politics. Just 20 feet below ground, Peppe and his workers made an amazing discovery: a huge stone coffer, containing five reliquary jars, over 1,000 separate jewels, and some ash and bone. Most remarkable of all, they found an inscription on one of the jars that appeared to say it contained the remains of the Buddha himself, who died 2,500 years ago. This discovery seemed to be the most extraordinary find in Indian archaeology. However, doubt and scandal have hung over this amazing find for more than 100 years. Some believe the discovery is an elaborate hoax, while others consider the site the final resting place of the leader of one of the world's great religions. Led by renowned historian, Charles Allen, *Bones of the Buddha* seeks to solve this mystery once and for all. **1x52 HD**

A Chef's Life

PEABODY AWARD WINNER

This enticing, character-driven documentary series takes viewers inside the life and kitchen of chef Vivian Howard who left New York City to open a fine dining restaurant in a small town in North Carolina. Each episode follows Vivian out of the kitchen and into cornfields, strawberry patches, and hog farms as she hunts down the ingredients that inspire her seasonal menus. Using a chef's modern sensibilities, Vivian explores Southern cuisine, past and present—one ingredient at a time. A celebration of true farm to table food, this series combines the action and drama of a high-pressure business with the joys and stresses of family life. Vivian and her husband Ben Knight juggle a full plate with a fire that nearly destroys the restaurant, the opening of a second restaurant, and a bustling young family to raise. **28x25 HD**

HISTORY

Jamestown: The Starving Time *(working title)*

It has long been speculated that the harsh conditions faced by the colonists of Jamestown during the winter of 1609 might have made them desperate enough to eat other humans—and perhaps even commit murder to do so. A recent excavation at the historic site discovered the carcasses of dogs, cats, and horses consumed during the season commonly called “the starving time.” But a few other newly discovered bones tell a far more gruesome story: the dismemberment and cannibalization of a 14-year-old English girl. This is the first direct evidence of cannibalism at Jamestown, the oldest permanent English colony in the Americas. Now scientists are trying to answer questions about this young girl they are calling Jane: How many people were involved in butchering her? Was she murdered or did she die of natural causes? *Jamestown* delves into the gruesome truths of the starving time. **1x60 HD**

The African Americans: Many Rivers To Cross

PEABODY AWARD WINNER

“... beautifully done...” —*The New York Times*

Written and presented by Professor Henry Louis Gates Jr., this Emmy® Award winning series explores the evolution of the African American people, as well as the multiplicity of cultural institutions, political strategies, and religious and social perspectives they developed—forging their own history, culture, and society against unimaginable odds. Commencing with the origins of slavery in Africa, the series moves through five centuries of remarkable historic events right up to the present—when America is led by a black president, yet remains a nation deeply divided by race. By highlighting the tragedies, triumphs, and contradictions of the black experience, the series reveals to viewers that the African American community has never been a uniform entity, and that its members have been actively debating their differences from their first days in this country. Throughout the course of the series, viewers see that the road to freedom for black people in America has not been linear, but more like the course of a river, full of loops and eddies, slowing, and occasionally reversing the current of progress.

The Rise of ISIS

“... required viewing” —*The New York Times*

From veteran producer and journalist Martin Smith, who was on the ground in Iraq when the U.S. began airstrikes in 2014, FRONTLINE's *The Rise of ISIS* is a major, in-depth investigation of the brutal terrorist group's ascent. Smith draws on in-depth interviews with Iraqi politicians, and American policymakers and military leaders to explore and explain how ISIS developed into what one interviewee calls “the Al Qaeda that Osama bin Laden only dreamed of building.” The film traces how ISIS gained strength in Syria, how the group is funded, how they operate, and how, city by city, from Ramadi to Fallujah to Mosul, ISIS swept across Iraq—seizing territory, recording and broadcasting mass executions, and drawing recruits from an estimated 80 countries. With ISIS continuing to take and hold territory in Iraq and Syria despite U.S. and coalition airstrikes, and with President Obama's foreign policy legacy hanging in the balance, this gripping documentary is the definitive account of how we reached this point. **1x53 HD** Also available: *Losing Iraq*

Who Killed Jimmy Hoffa?

In one of history's most fascinating unsolved mysteries, Jimmy Hoffa, former labor union president, went missing on July 30, 1975, never to be found. Hoffa, a hero to many working Americans, played a major role in the growth and development of the trucking union, but there were allegations that the powerful pension fund was under mob control and used, among other things, to finance Vegas casinos. What exactly happened to Hoffa that day, and why? Recently declassified FBI files and interviews with people close to the story provide a detailed account of what likely occurred. The investigation is an exploration of Hoffa's final days and a revelatory window on power and corruption in the post-war era labor movement. **1x55 HD**

Texas Servant Girl Murders

In 1885, six African-American servants and two white society women were killed in Austin, Texas—almost all bludgeoned with an ax, dragged from their beds, and raped. As quickly as the killings started, they stopped. No killer was ever identified. Desperate to find someone to blame, the authorities first rounded up hundreds of black men. Later, they pointed the finger at a white man, James Philips, whom they accused of murdering his teenage bride. Although Philips was eventually acquitted, the trial was akin to the OJ Simpson trial, with sensational, lurid details spilling out in court. After the furor and panic died down, so did the memory of the killings. A team of historians pour over the records and apply cutting-edge police techniques to determine who killed the servant girls of Austin. **1x55 HD**

Wry and distinctive visual humor, charming plotlines, and lovable characters combine with a comprehensive science program to attract and engage young children. Viewers follow a newly-hatched chicken (Peep), a smart and sassy robin (Chirp), and an endearingly egotistical duck (Quack) on all their wide-eyed adventures—from discovering shadows, to investigating mysterious tracks, to learning about gravity (sometimes the hard way)! **34x23**

ART & CULTURE, HISTORY

American Epic

Executive produced by T Bone Burnett, Robert Redford, and Jack White, *American Epic* tells one of the greatest untold stories of America: how ordinary working people were given the opportunity to make records for the first time. This technological and cultural revolution of the 1920s gave a voice to Americans regardless of their race, gender, and creed and the songs that poured forth became a kind of early social network through which people of different races and cultures began to hear themselves and each other for the very first time. This remarkable music transformed not only America but the world, giving birth to pop, rock, R&B, folk, jazz, country, and hip hop.

American Epic uncovers countless untold stories, unseen photographs, films, and missing pieces of American musical history. The producers succeed in re-creating the recording technology of this period, inviting famous modern musicians including Elton John and Bernie Taupin, to try it for the first time in almost 100 years, and demonstrate the power of this early music. Rock innovator Jack White collaborates with the multi-platinum hip hop star Nas,

among others and cuts records in exactly the same way that the blues icons Charley Patton and Bessie Smith would have done. *American Epic* not only tells the untold story of the Big Bang of American music, but it brings it to life in an entirely new way. **Fall 2015, 5x60 HD**

ANTON BALAZH FOR SHUTTERSTOCK.COM

Making North America

For the first time, NOVA presents a bold and sweeping biography of the North American continent and how it came to be. *Making North America* reveals how startlingly different the continent's ancient past was compared to today—giant marine reptiles once swam over the cornfields of Kansas; the site of present-day Manhattan was buried under a mile of ice and the bedrock of Central Park was once part of a mountain range as high as the Himalayas; and gigantic super-eruptions almost tore the continent in two just before the dinosaurs rose to rule the land. To visualize the vanished landscapes and the hidden forces that shaped them, the series features live-action CGI animation sequences that lift the lid on North America, stripping away the ancient rock layers to reveal the past. Told with the help of leading geological detectives, *Making North America* is a spectacular, eye-opening adventure into the continent's tumultuous past. **Fall 2015, 3x60 HD**

Leslie Caron: I'll Love You When You're a Star

Leslie Caron, the beloved star of *Gigi*, *An American in Paris*, and *Daddy Long Legs*, personifies the Golden Age of American cinema. She has appeared in 45 films—a rare triple threat in the worlds of movies, dance, and theatre. She is, even today, an all-access pass to Hollywood's Who's Who. Her recently published memoirs, *Thank Heaven*, reveal the glamour, inspirations, and disappointments of a spectacular career and a turbulent personal life. And Caron tells all: the early catapult to stardom, the leading men (Fred Astaire, Cary Grant, Maurice Chevalier), famous lovers (Warren Beatty, Frank Sinatra, Peter Lawford), three failed marriages, triumphs on screen and stage, and, more recently, her depression, breakdown, and recovery. Through Leslie's stories, we are introduced to the fascinating and troubled personalities of the Classic Hollywood era. **Fall 2015, 1x52, 1x80 HD**

Treasures of the Earth (working title)

From earliest times, precious stones and metals have captivated humanity as the ultimate symbols of wealth and power. In this landmark series, NOVA explores how these precious materials were forged in extraordinary circumstances—deep within the Earth and even within exploding stars—and investigates the techniques pioneered by prospectors and miners to retrieve these rare minerals, from sheep's fleece and birds of prey to the demolition of entire mountains. This series examines how their unique properties lead to ingenious innovations, from the gold on an astronaut's visor to the ruby at the heart of a laser and the "diamond anvil" that allows scientists to recreate the crushing pressures at the Earth's core. We meet today's pioneers who—like latter-day alchemists—are outdoing nature and synthesizing these treasures of the Earth in the lab. **Spring 2016, 4x60 HD**

SCIENCE

Biology 2.0 (working title)

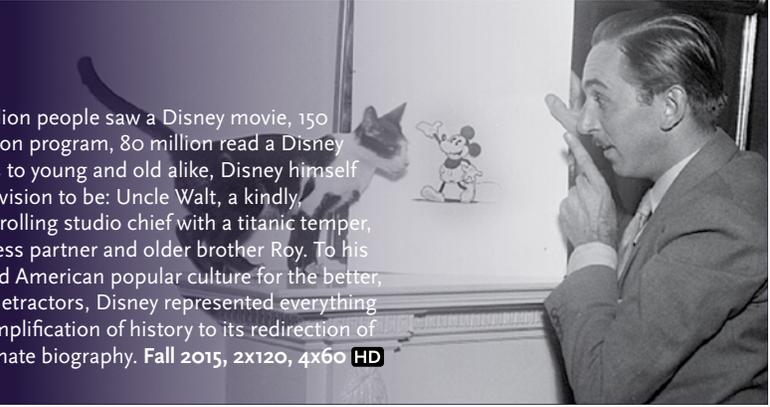

Just as synthetic chemicals have revolutionized industry, a new form of synthetic science is about to change the way humans and scientists think about the living world. Synthetic biology is the application of building living matter from basic building blocks of life: DNA and genes. Now, scientists are modifying genetic code to create new products—everything from redesigned bacteria that fights disease to synthetic leather for handbags. *Biology 2.0* explores the emerging world of this exciting, new science. The potential applications are promising—from the production of energy to new bio-materials, synthetic biology could usher in an era of greater efficiency, cheaper costs, and lower pollution. **Fall 2015, 3x60 HD**

HISTORY, ART & CULTURE

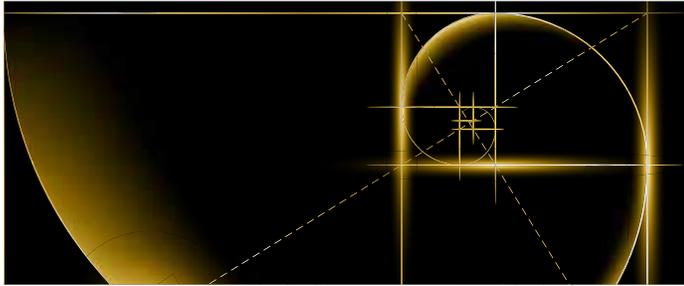

Walt Disney

In 1966, the year he died from lung cancer, Walt Disney was everywhere: 240 million people saw a Disney movie, 150 million read a Disney comic strip, 100 million tuned in weekly to a Disney television program, 80 million read a Disney book, and 80 million bought Disney merchandise. Yet as familiar as his work was to young and old alike, Disney himself was something of an enigma. For many, he was exactly what he appeared on television to be: Uncle Walt, a kindly, avuncular figure, as self-effacing as he was enthusiastic. To others, he was a controlling studio chief with a titanic temper, a demanding taskmaster whose wrath even extended to his long-suffering business partner and older brother Roy. To his fierce defenders, Disney was a visionary artist and entrepreneur who had changed American popular culture for the better, grounding it once again in a spirit of hopeful promise and shared values. To his detractors, Disney represented everything that was wrong with American culture, from its saccharine sentimentality and simplification of history to its redirection of our attention from reality to fantasy. His life and legacy are unraveled in this intimate biography. **Fall 2015, 2x120, 4x60 HD**

Great Math Mystery with Mario Livio

NOVA leads viewers on a mathematical mystery tour—a provocative exploration of math’s astonishing power across the centuries. A Romanian-born astrophysicist at the Hubble Space Telescope Science Institute in Baltimore, Mario Livio’s passion and down-to-earth delivery makes him a mesmerizing speaker about math’s ultimate riddle: Is math an invention or a discovery? Humankind’s clever trick, or the language of the universe? Drawing on simple hands-on demonstrations and playful animated thought experiments, Livio probes great minds from Pythagoras to Einstein and beyond. With infectious enthusiasm, *The Great Math Mystery* sheds fascinating light on how math works in our brains and ponders the ultimate mystery of why it works so well when decoding the universe.

FIRSTLIGHT FILMS

WildWays: Corridors of Life

Wildways showcases new, cutting-edge solutions for making room for wildlife on an ever-more crowded planet. Since the start of the Industrial Revolution, human development has usurped the homelands of the largest mammals on Earth and confined them to parks and preserves. Recent research shows that these islands of habitat are too small and disconnected to sustain healthy populations of animals. A new approach, connectivity conservation, is attempting to link these isolated groups of wildlife in novel ways. From jaguars navigating the U.S.-Mexico border to mountain lions crossing the Trans-Canada Highway, and elephant families migrating across African savannahs, *Wildways* is a unique story about a new vision for re-assembling a fragmented planet. **Fall 2015, 1x60 HD**

I’ll Have What Phil’s Having (working title)

Join Emmy® Award-winning producer and director Phil Rosenthal, creator of *Everybody Loves Raymond*, for an unforgettable travel series that dishes up the sublime fare that is bursting onto the international culinary scene. In each episode a remarkable chef takes Phil to a world-class city and shows him exactly where to eat. Viewers tag along as he circumnavigates the globe, leading them from a three-star Michelin restaurant in an Italian palazzo to a hidden kitchen in China or a private residence in remote India. Joining Phil on his travels are chefs such as French Laundry’s Thomas Keller and *The Fat Duck*’s critically acclaimed Heston Blumenthal. And Phil’s unique Hollywood connections even loop in celebrities who define themselves as foodies, such as Juliette Binoche from *Chocolat* and Lorraine Bracco of *The Sopranos*. These fellow adventurers not only share their culinary knowledge, but also serve as foil for Phil’s unexpected humor as they indulge in decadent food in far flung places. **Summer 2015, 6x60 HD**

The Robots are Coming (working title)

From the classic films *Metropolis*, to *Bladerunner* and *The Terminator*, robots have starred in films almost as long as we’ve been making them. Recent technical developments could finally turn sci-fi fantasy into reality. Exponentially growing computer power, miniaturized components, cheap sonar, infrared, and laser sensors, are all booting up a revolution in robotics. In labs around the world, engineers and scientists are building robots to take over what have always been uniquely human jobs: robot maids to do our laundry, robot workers to handle the tedious jobs on factory assembly lines, rescue robots to lead us out of harm’s way, even robots to teach our kids and care for aging parents. *The Robots are Coming* examines both the state of the art as well as the social implications of a world filled with robots. Is this a brave new world, or a future to fear? **Fall 2015, 1x60 HD**
