*Wild Ways* showcases new, cutting-edge solutions for making room for wildlife on an ever-more crowded planet. Since the start of the Industrial Revolution, human development has usurped the homelands of the largest mammals on Earth and confined them to parks and preserves. Recent research shows that these islands of habitat are too small and disconnected to sustain healthy populations of animals. A new approach—called connectivity conservation—is attempting to link these isolated groups of wildlife in novel ways. This film is a unique story about a new vision for re-assembling a fragmented planet.
