It's long been known that German soldiers used a methamphetamine, called Pervitin, in WWII. But have tales of Nazis on speed obscured the other side of the story: of the massive use of stimulants by British and American troops? Did total war unleash the world's first pharmacological arms race? And in the face of industrial slaughter, what role did drugs play in combat? Now, historian James Holland is on a quest to dig deeper and unearth the truth behind *World War Speed*.
